Early Childhood Council Shared Measures Report
SFY21-22

Please select the ECC you are interested in viewing the report for:

All ECCs: Rocky Mountain ECC (1) ▾

This report is reflective of data from the most recent Shared Measures reporting cycle, which ran from July 1, 2021 to June 30, 2022. For more information about the data that informed this report, please see the last page of this report.

The Early Childhood Shared Measures were collaboratively developed by Early Childhood Councils (ECCs), the Early Childhood Councils Leadership Alliance (ECCLA), and the Colorado Department of Early Childhood (CDEC) through the Local Organizational Capacity work of the Preschool Development Grant (Colorado Shines Brighter Birth-Five Strategic Plan strategy 1.2.4).

The purpose of the measures is to highlight the collective impact of ECCs on Colorado's early childhood system. Elevating this collective impact to policymakers, funders, and community members will establish a clear story of the value ECCs bring to their communities and the state.

The measures included in this report were developed utilizing the following guiding principles:

1. Balance activity with outcome
2. Strive for consistency and efficiency
3. Honor locally-selected measures
4. Vary targets to represent success
5. Support continuous and sustainable capacity, equity, and quality

The complete ECC Shared Measures Guide can be found here.

COLORADO
Department of Early Childhood

1. Statewide Outcome: High-quality early care and education is available to every child in every community

This approximates the percent of children in your catchment area with access to high-quality licensed care.
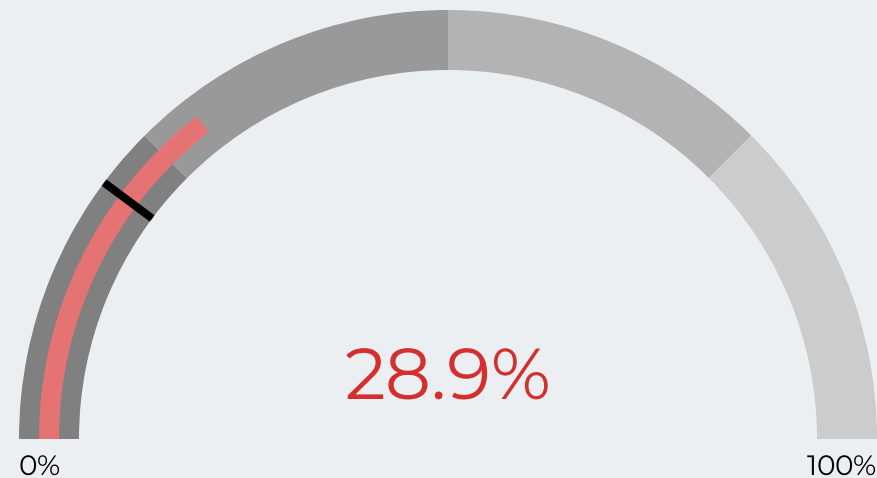

Data obtained from CDEC

You are viewing data for:

All ECCs: Rocky Mountain ECC   (1) ▾

High Quality Capacity: 2,170

Estimated Birth to Five Population: 7,502

Percentage of the estimated Birth to Five population that could be served in high quality care:

28.9%

0%   100%

The statewide percentage of high quality capacity versus Birth to Five population is **20.4%** and is represented by the black bar on the gauge. The red bar and percentage associated with the gauge will change depending on the ECC selected and their specific data.

Data Notes: High-quality capacity is defined as the total capacity of licensed programs with a CO Shines rating of 3-5. The estimated Birth to Five population is derived from the CO State Demographer's Office 2022 Forecast and may not be consistent with other population estimates from other data sources.
n = 35. Data for all Councils was pulled by CDEC, regardless of their participation in the ECC Shared Measures survey.

1.1 Local Program Priority: Promote licensed early childhood education

This approximates the percentage of each age population in your catchment area with access to licensed care.

Data obtained from CDEC

You are viewing data for: **All ECCs:** Rocky Mountain ECC   (1) ▾

## Infants (0-18 months)

Licensed Infant Capacity	Estimated Infant Population	Percent of the estimated population with access to licensed care
296	2,244.5	13.2%

Unlike centers, home providers are not licensed for specific age group capacities. In an effort to include home capacities in our counts, we assume 2 infants are served at each home provider.

The statewide percentage is **11.5%**

0%   100%

Toddlers (18-36 months)

Licensed Toddler Capacity	Estimated Toddler Population	Percent of the estimated population with access to licensed care
739	2,203.5	33.5%

Unlike centers, home providers are not licensed for specific age group capacities. In an effort to include home capacities in our counts, we assume 2 toddlers are served at each home provider.

The statewide percentage is **24.5%**

0%   100%
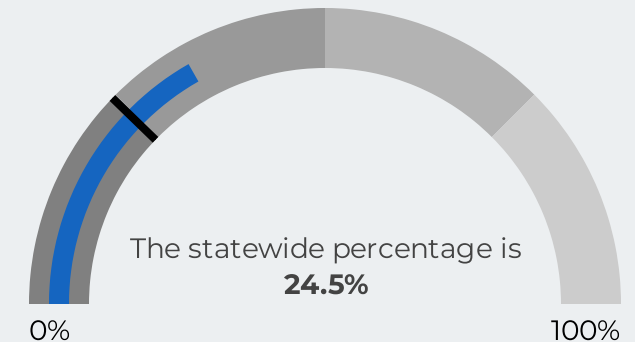

Preschoolers (36 - 60 months)

Licensed Preschool Capacity	Estimated Preschool Population	Percent of the estimated population with access to licensed care
2,979	3,054	97.5%

These preschool capacity figures should not be used to estimate UPK capacity. *There are some preschool capacities that permit centers to provide care to either preschool OR school-age children, resulting in a mix of ages served. Unlike centers, home providers are not licensed for specific age group capacities. In an effort to include home capacities in our counts, we assume 2 preschoolers are served at each home provider.*

The statewide percentage is **94.1%**

0%   100%

n = 35. Data for all Councils was pulled by CDEC, regardless of their participation in the ECC Shared Measures survey.
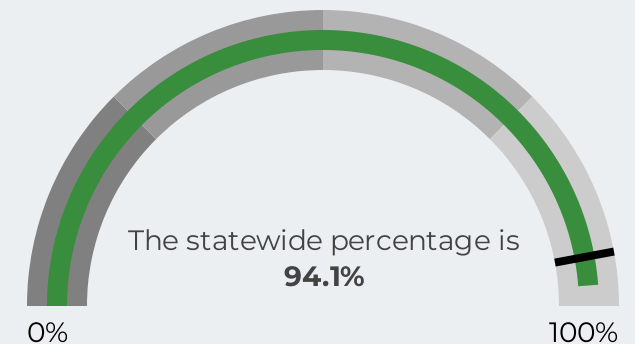

1.2 Local Program Priority: Percentage of sites offering licensed high-quality early childhood programming to children

This approximates the percentage of licensed providers in a Council's catchment area offering "high quality" child care according to Colorado Shines.

Data obtained from CDEC
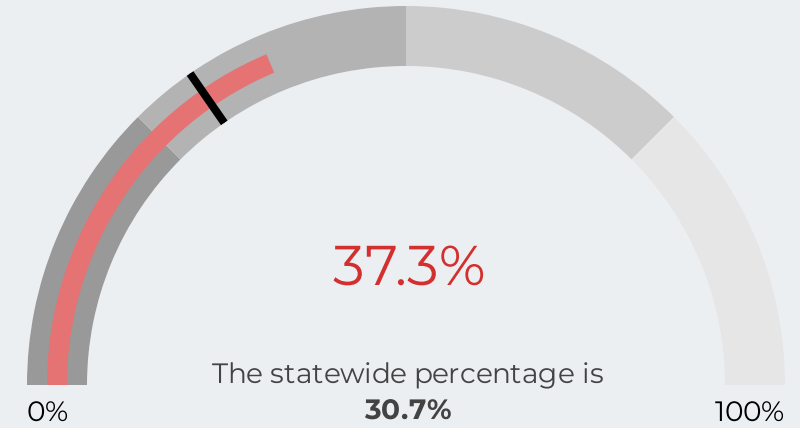

You are viewing data for:

All ECCs: Rocky Mountain ECC (1) ▼

**High Quality Providers:** 44

All QRIS-Eligible Providers: 118

37.3%

The statewide percentage is **30.7%**

0%   100%

The table below shows the number of providers who fall within each quality level

Quality Level	Count
1	39
2	35
3	7
4	32
5	5

n = 35. Data for all Councils was pulled by CDEC, regardless of their participation in the ECC Shared Measures survey. School Age Child Care Centers, Neighborhood Youth Organizations and Resident Camps were excluded from the total provider count since they are not QRIS-eligible.

2. Statewide Outcome: Contributes to a more highly-qualified early childhood workforce

This approximates the percentage of a Council's total PDIS registered users that are taking more than the minimum 15 hours of professional development.

Data obtained from CDEC
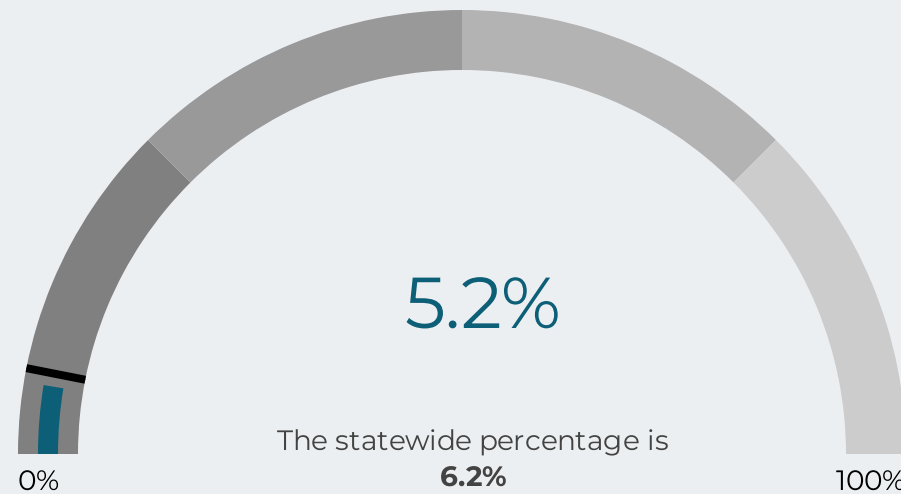

You are viewing data for:

All ECCs: Rocky Mountain ECC   (1) ▼

Registered PDIS users with more than 15 training hours: 41

Registered PDIS users linked to a Licensed Provider: 789

5.2%

0%

The statewide percentage is **6.2%**

100%

For ECCs that serve more than one county, see the table below for county specific data

County ▲	Users15+	UsersTiedtoLicense	Users15+.Percent
Eagle	26	379	6.9
Garfield	6	237	2.5
Lake	1	29	3.4
Pitkin	8	144	5.6

2.1 Local Program Priority: Number of PD opportunities provided at local level

Data obtained from Councils using ECC data

You are viewing data for:

All ECCs: Rocky Mountain ECC   (1) ▾

Number of professional development opportunities provided in the region(s) you selected in the dropdown box: 19

Median number of professional development opportunities: 12

n = 27. This is the median amongst the 27 ECCs who submitted data for this question. Median was used because it's less sensitive to larger data ranges than Mean.

2.2 Local Program Priority: Number of ECE professionals who have taken training/professional development in a prioritized competency

You are viewing data for:

All ECCs: Rocky Mountain ECC   (1) ▾

This ECC's prioritized competency:

Social-Emotional Health and Development Promotion

166   **ECE Professionals took a training in PDIS related to this competency.**

Below shows how many Councils selected each Prioritized Competency

Prioritized Competency	Council.Count
Social-Emotional Health and Development Promotion	13
Child Growth, Development, and Learning	5
Family and Community Partnerships	2
Teaching Practices	1
Health, Safety, and Nutrition	1
Child Observation and Assessment	1

n = 23 selected a Prioritized Competency category. n = 24 indicated the number of ECE professionals who engaged in Prioritized Competency training(s).

2.3 Local Program Priority: Coaching available to ECE professionals provided by or funded by Councils

The sum of these numbers provides the total number of coaching hours offered by the Council during the reporting period.

Data obtained from Councils using Sugar and ECC data

You are viewing data for:

| All ECCs: Rocky Mountain ECC (1) ▾ |
| --- |

Sugar Coaching Hours: 1,368.25

Percent of Coaching Hours from Sugar: 64.9%

Other Coaching Hours: 739.25

Percent of Coaching Hours from Other Systems: 35.1%

Total Coaching Hours: 2,107.5

For Councils who submitted data, this was the overall split between Sugar hours and Other hours:

39.5%

60.5%

● Sugar
● Other

n = 26 submitted responses for one or both questions relating to coaching hours.

2.4 Local Program Priority: Number of Expanding Quality in Infant Toddler Care Initiative and/or Pyramid graduates

You are viewing data for:

All ECCs: Rocky Mountain ECC   (1) ▾

EQIT Graduates	Pyramid Plus Graduates	Total Number of Graduates*
20	No data	20

Data Note: The total number of graduates does not equate to unique individuals. It is possible an individual could have graduated from both programs. n = 23 EQIT (3 data inaccessible). n = 20 Pyramid Plus (3 data inaccessible). n = 25 submitted responses for one or both questions relating to graduates.

3. Statewide Outcome: Provide access to affordable, quality, licensed early childhood education in communities through grants and financial assistance

This approximates the percentage of children most in need in a Council's catchment area with access to publicly supported early care and learning programs.

Data obtained from CDEC and Councils

You are viewing data for:

All ECCs: Rocky Mountain ECC   (1) ▼

| CCCAP Authorizations	Head Start Capacity	CPP Capacity	Preschool Special Education Capacity	Locally Funded Preschool Programs' Capacity
268	280	508	307	No data

Total access to publicly supported programs*: 1,363

Total number of children at 185% FPL: 3,639

37.5%

0%   100%

For ECCs who provided data for their publicly supported early care and learning programs, the overall percentage of children most in need versus access to publicly supported early care and learning programs is **58.9%** and is represented by the black bar on the gauge.

3.1 Local Program Priority: Percentage of CCCAP-Accepting Programs

This approximates the percentage of a Council's licensed providers that accept CCCAP.

*Data obtained from CDEC*

You are viewing data for:

Data Notes and Limitations

You are viewing data for:

All ECCs: Rocky Mountain ECC   (1) ▾

30 ECCs (88%, out of 34 ECCs), representing 55 counties (86%, out of 64) actively participated in this Shared Measures Report via the data collection survey. When CDEC was responsible for providing data, it was provided for all counties regardless of their participation in the survey and will show as an n size of 35 (34 ECCs and 1 unrepresented during the reporting period).

Below are the survey response rates (n size; question was answered) for the 30 actively participating ECCs. Participation in the Local Program Priorities was discretionary; as such, response rates were only calculated for Statewide Outcomes. Response rates were determined by calculating the number of ECCs who provided any data for any component of the Outcome. Please note: ECCs could have responded with "-1" (see next data note) so response rate is not an indication that the data provided by each responding ECC was used in the overall calculation.
Statewide Outcome 1: 100% response rate (30/30)
Statewide Outcome 2: 100% response rate (30/30)
Statewide Outcome 3: 100% response rate (30/30)
Statewide Outcome 4: 100% response rate (30/30)
Statewide Outcome 5: 97% response rate (29/30)

In the event that an ECC was unable to access data to respond to a survey question, they were directed to enter a "-1". If an ECC entered "-1" for any question, they were counted in the response rate (n size) but the figure was changed to NA for any calculations so as not to subtract from other accessible data. If the data for a metric was inaccessible, or otherwise not provided, it will appear in the report as "No Data". The number of ECCs who indicated the relevant data was inaccessible is listed after the n size on each slide.

While we had high levels of participation by ECCs for this report, it is important to note that 4 ECCs (representing 8 counties) did not participate. Additionally, 1 county, Archuleta, was not represented by an ECC during the reporting period and is therefore not reflected in this report either. We should be cautious in using this report to make statewide generalizations given the incomplete representation of the data.

CDEC used the Colorado State Demographer's 2022 Forecast to estimate population data. This may not align with other resources used to estimated population.

CDEC used the Licensed Child Care Report pulled on 08-01-2022 to provide capacity, quality and provider volume data. This file can be accessed on the Colorado Information Marketplace.

Please refer to the ECC Shared Measures Guide for more detailed information about each measure's limitation(s).
